RETAIL PRE CUT CATALOG

Autumn/Winter 2024

# Pre Cut Specialty Cheese Program

We offer a complete selection of retail-ready precut cheeses, from blues to bloomies, from USA to Denmark, and from hand-wrapped to cryovac'd.

For those who do not cut & wrap large-format wheels of cheese in-house, our precut program is a turn-key way to offer a full range of freshly-cut specialty cheeses that attract specialty deli shoppers to the cheese department. We also offer an optional pricing service, so you can simply stock retail-ready cut cheeses out of the box directly into your display case.

For those who cut & wrap cheeses in-house, our precut offerings are a great way to keep the case fully stocked. By freeing up time from high-volume, production style cutting, mongers can focus their expertise on handcutting the most delicate cheeses and providing service and great recommendations to customers.

Please enjoy browsing our current selection of freshly cut specialty cheeses. If there is a cheese we do not currently offer that you would like to have cut, please reach out to your Peterson Sales Representative for information about availability and pricing.

# Cheese Wrap Styles

## Cryovac

Ideal for dry, semi-firm, and hard cheeses. Cryovac vacuum packaging optimizes shelf life and creates an oxygen-free environment that inhibits mold growth. Shelf life is up to 180 days from production and varies by product.

## Shrink Wrap

Ideal for soft, firm, and hard cheeses, but especially for soft-ripened and blue cheeses. Attractive, clean look with minimal seams, and the seal contains the moisture from cheeses that weep when cut. We use a breathable plastic film with a high oxygen transmission rate to keep *fleur* (mold on the cheese rind) alive and healthy. Shelf life is 20-60 days from production and varies by product.

## Hand Wrap

Ideal for soft, firm, and hard cheeses. Upscale presentation conveys an in-house look and sends “fresh” cues. We use breathable plastic film with a high oxygen transmission rate to keep mold and cheese rinds alive and healthy. Shelf life is 14-30 days from production and varies by product.
